Artisan Production

Knit Lab combines its heritage with modern design, reflecting the craftsmanship of Peruvian artisans to showcase the quality of these fibers. We design and produce handmade garments through the following techniques:

- Hand Weaving
- Hand Knitting
- Hand Embroidery
- Manual Knitting and Weaving Machine

New forms of handcrafting techniques are being expressed through a new generation of artisans who interpret modern design using ancient techniques. We offer a combination of modern technology and ancient tradition.

Electronic Production

Knit Lab also offers electronic knitting machine service. In gauge 8, 10, 12. for a lightweight kind of knit.

For this electronic knitting production the minimums are 34 units per model, and it depends on the designs and details.
